

NEWS AND VIEWS . . .

And What Have You

By BOB CRAIG

We hope that you are able to tell a difference in this issue of the Herald. We have changed our printing process over to what is called in the trade — "Offset."

In making this change we have two goals in mind. The first is to simplify our production process which will enable us to produce a better paper; and the second is to give our readers a much clearer and easier to read paper with better pictures.

This new method of producing newspapers is sweeping the country and is the first major change in the past 50 to 75 years. Because the method is too expensive for one small paper to put in by itself the trend is to central printing plants.

While all of the preparation for this week's issue was done in our plant here in Hamlin the actual printing was done in a central plant at Munday. We have been watching this trend for a number of years but this is the first time that a central plant has been located within driving distance. Some publishers carry their papers over 100 miles to take advantage of this new method.

We hope that with this change we will be able to offer our readers a paper closer to the standards that we feel they deserve.

While this change will improve our reproduction we are still trying to improve our news coverage of Hamlin and this area. In this direction we find that we need to stick closer to our news deadlines.

As with any production operation there is a limit to the work load that we can handle in any one day and if we are to improve our coverage we must spread this load out. This is the reason that we must have weekend or before stories in our office by Monday so that we can take care of Monday's news on Tuesday and Tuesday's news on Wednesday.

As with all rules, there are exceptions but we do ask that you help us in our efforts to improve your paper.

We received the following letter from Mrs. Jaylon Finnannon, the former Judy Fitzgerald, thanking the citizens of Hamlin for their support of retarded children in this area.

"A thousand words cannot express how much I appreciate all that each one of you did in helping us with our Rummage Sale for Retarded Children. It renews my faith in fellow man to know how much people are willing to help others.

"I have always felt like there is no town like a home town and you have truly proved that to me. Here is a poem that I have kept for quite a long time, just knowing that some day there would be an opportunity to share it with 'my town.' It was taken from the Los Angeles Herald Examiner.

"Sketches by Ben Burroughs.

"You never miss the old home town — until you go away — then things taken for granted — will in your memory stay — when fate takes you up in its arms — and sets you down afar — you become a stranger — exactly where you are — gone are familiar places — and haunts you used to know — these loom as important — thoughts about them will grow — however satisfied you are — with where you may reside — somehow you'll miss the old home town — away down deep inside — so if you can stay close to home — be thankful in your heart — you never miss the old home town — until you have to part."

We were pleased that a good number of voters turned out in Saturday's Primary but we must agree with Don Weddington who asked on TV Saturday night what it would take to get everyone out to vote. With local races, a strong race for governor and both liquor and betting on the ballot what more would it take to get people interested?

We had the occasion last week to spend some time in our city park and must say that we have never seen it in better shape than it is this year. Apparently a large number of people are using it and for this we are thankful.

We express our appreciation to the council and to the city employees for their work in this area.

Siren Fund Nets \$700

The fund for the purchase of tornado warning sirens for the City is steadily growing as high school students and other volunteers join with the Airways C-B Club in the drive.

Jerry Pritchard, club president, said Tuesday morning that the amount had reached over \$700.

The sirens will cost approximately \$250 each and then there will be some expense for installation, he said.

The City will purchase one of the units and then they also said the old fire siren that is not being used can be put into operation. Some repairs would be necessary to make it operable.

The units, 100 watt Yappers, will be purchased as soon as the drive is completed. The northwest and most of the southwest sections had been canvassed by Tuesday.

THANK YOU

May 6, 1968

I wish to thank you, the voters for the good support you gave me in the first primary, and to thank my opponents for a good clean race. I still consider all of you my friends. To those of you who supported me, I beg of you to continue to support me in the coming election on June 1. And to those who did not I hold hold no ill will, but sincerely hope you will consider voting for me in the coming election.

I have no promises to make other than to continue to do all I can at all times. The weather can have a lot to do with what and how much we can do. We have about 400 miles to maintain, which takes 4 graders 5 to 6 days to drag over. It takes 2 shredders 6 weeks to 2 months to cover, as there are 800 miles of ditches at a round to the ditch would be 1600 miles. After a good rain the ditches stay too wet for a week or so and if it rains again the weeds and grass will get neck high. Then there is gravel to be hauled, grading to be done, culverts to be cleaned out, and bridges to be rebuilt. We have most of our big bridges solid steel and concrete, and plan to get them all as soon as possible. I tell you this that you may know why we may not get certain things done.

I want to give the men that work with me credit for doing a good job, they not only can but do, and are anxious to do so.

We are as economical as we can be, and have not been in the red for ten years. We have the best equipment, although some of it is old, we keep it in good shape. We do most of our mechanic work at a savings to the county. We have good tools to work with, along with a stationary and portable welding equipment.

We have been set back due to rains just as farming has been, and have nearly lost some roads we thought were good, but given a chance we will work out of it.

Please give us the opportunity and we will do our best to see that this precinct ranks with the best. This is my only job and I am proud of it and see to it daily.

Thanks a million.

As It Looks From Here—

Cong. Burleson Deplores College 'Sit-Ins,' Other Demonstrations

Omar Burleson, M. C., 17th District, Texas, WASHINGTON, D. C. — We can be very proud of our colleges and universities where no "sit-ins" and "lie-ins" have taken place.

In fact, it is beyond the imagination that students who respect and enjoy the opportunity of getting an education would permit a small, militant, disruptive minority to completely paralyze the institution to which they are devoted.

Here in Washington, some 60 odd students were able to totally close down Howard University of 8,000 enrolled students. This University is largely supported by Federal funds and out of which have come able men and women who have contributed greatly to the Negro race.

Maryland University at College Park was paralyzed by "student power" until the greater part of vague demands were met.

Until the Police were called in and arrested the ringleaders, a comparatively few students forced the closing of Columbia University, continuing their defiance even after some of their demands were met.

All this happens at a time when thousands of students would like to get into Columbia, Howard University and other institutions of higher learning but have been turned back because of a lack of space.

These militants talk of Free Speech and free assembly but what they do is to deprive others by force and intimidation of the rights they claim for themselves.

Recently, at the University of Wisconsin, two Members of the President's Cabinet were hooted and heckled so raucously that the civil rights

of free assembly was turned into a civil wrong of a free-for-all, preventing those who wanted to listen from hearing the speakers. In many instances, as was the case at Columbia University, junior professors have joined students encouraging violence.

In the case of Maryland University the strategy decided upon by the militants was to find issues on which the University authorities could not afford to yield and then push their demands with sit-ins and campus strikes. This has been the pattern at university after university. More recently at Princeton students demanded the right to fix policy and run the University.

On last March 17, a reporter from the Caller-Times of Corpus Christi quoted the speech of a young professor at the University of Texas who told an audience of students and faculty that he favored "toppling the power structure of our society" by taking property, production and mass communication out of private hands. The plan, according to the Caller-Times reporter, advocated by the university professor was that if such a program began catching on with enough people, sooner or later the Government would step in to force it to a halt. "At that point," he said, "revolutionaries will have to fight to survive."

The Assistant Professor of Philosophy, Larry Caroline, was further quoted as saying that political and cultural revolution was necessary because legislative reforms had proved unable to cure society's ills. "Abolition of private property is necessary for a just society and legislation won't go that far," he is quoted as saying. He said until people are con-

vinced that "property is theft," that little justice can be attained in America.

Perhaps we should not wonder at the conduct of a few rabble-rousers who come under the influence of such teachings.

On March 12, 1964, in this space, attention was called to the power and influence of university students in foreign countries, the implication being that it could not happen here, but it has and it is.

Just as was the case at Berkeley, there is reason to believe that a pattern of Communist influence is present in these actions.

In our area students loyal to their school and grateful for the opportunity of an education, would likely save college and university officials the trouble of disciplinary action by throwing these elements off the campus themselves.

Driving With Suspended License Charged Here

Jimmy Loyd Ingram, 24, was charged with driving while license suspended in Jones County Court Tuesday morning and bond was set at \$500 by Justice of the Peace John Barnett.

He was also charged with failure to stop for a stop sign and operating a motor vehicle without a muffler. The arrest resulted from a chase both in a car and later on foot by Patrolmen Bobby Scifres and Kenneth Hobbs.

The subject escaped from officers but later surrendered at the Police Station.

Brucellosis Rules Amended for Safer Handling

Brucellosis regulations governing the interstate movement of cattle have been amended to provide further safeguards to animals moving through markets, reports County Agent Kirby Clayton.

Previously, cattle could move interstate when they

had been tested for brucellosis at a market and found negative. Now, in addition, these animals must be from herds not known to be affected with brucellosis. This applied to animals moving through markets, the same safeguards that have been in effect for many years on the interstate movement of cattle directly from one farm or ranch to another. The amendment was scheduled for publication in the Federal Register April 12 and will become effective on publication, says Clayton.

Experience has revealed that this additional precautionary measure needs to be initiated to protect the gains already made. Today, 92 percent of the Nation's counties have achieved a Modified Certified Brucellosis status by reducing the incidence of the disease to less than one

percent of the cattle population. Approximately 31 percent of the Nation's counties have reached the ultimate goal of the Cooperative State-Federal Brucellosis Eradication effort — a Certified Brucellosis Free Status.

More men than women died of cancer last year. The American Cancer Society says this has been true since 1949. The ratio in 1968 will be about 53 men to 45 women.

MOTHER

It is so important that a child feel secure and loved the first weeks and months of its life. Our foremost authorities say that if a child's spiritual and emotional welfare is neglected in the early weeks of life, there is a great chance of permanent damage to its personality growth.

Therefore, on this day, we honor not only the beloved mothers of our adults and youth, but the very young mother who has both the tremendous responsibility and the precious opportunity to mold the life and character of the very young child. May she seek early God's help, who in the person of the Son, said, "Suffer the little children to come unto me."

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny, the truth which alone will set him free to live as a child of God.

Group to Form Panel Here On Discrimination

The panel discussion presented by several Abilene women here Monday night was so impressive that the motion was made to conduct a similar panel here in Hamlin.

The meeting to set up the discussion group will be held Tuesday, May 21, in the parlor of the First United Methodist Church.

Mrs. Doyle Ragle, president of Abilene Churchwomen United and wife of the United Methodist District Superintendent, was moderator.

Other members of the panel were Mrs. Abe Anton, Jewish; Mrs. Mildred Martin, Roman Catholic; Mrs. Magnolia Baker, Negro Methodist; and Mrs. Henry Jones of White Anglo Saxon Protestant (WASP).

The women talked on personal experience concerning discrimination.

Mrs. Baker said that we do not look at people as individuals but as groups and judge them but as group's behavior, rather than as an individual.

The principal solution the women offered was the better education of children so that prejudice would lessen with coming generations.

One panel member mentioned that if prejudice is not taught, in 20 years it will disappear.

The meeting in the high school auditorium was under the sponsorship of the Ministerial Alliance and the Hamlin BCD.

PREWIT MOTORS — S.E. First

AUSTIN — Texas Liquor Control Board is heading for an early showdown test of its new get-tough policies on subterfuge private clubs.

In a surprise order, the Board outlawed cash sales in all bottle clubs.

Some club operators, who already were complaining mightily about an earlier LCB directive prohibiting managers from issuing guest cards to walk-in customers, were hard hit. One promptly filed a lawsuit here to enjoin the board's regulations.

Net result of the cash sale requirement will be to eliminate the casual guests, since operators wouldn't want to run the risk of granting total strangers a month's credit for a highly-perishable commodity.

Hotel-motel clubs who expect to solve the problem by putting club charges on room tabs may find the Board's definition of a cash sale quite restrictive: "It shall be deemed that a cash sale has been made if payment for a service or commodity is made on the same date or within eight hours after the occurrence of such service or the delivery of such commodity."

Clubs also received a long list of new instructions for keeping records and running their affairs according to by-laws and through boards of directors.

More rules are expected to be forthcoming from the LCB. Times may be hard for all but strictly-private and proper clubs in the near future.

LCB Attorney Lynwood Elliott said he thinks the cash sale directive will restrict clubs: "I feel, quite frankly, that when you prohibit a club from making a cash sale it will be less inclined to serve the public at large and will start serving properly screened members."

Situation is expected to bring new pressures for liquor-by-the-drink legalization. Club owner claim they are being made political footballs.

RIOT CONTROL TRAINING — All Department of Public Safety officers have undergone an intensive, accelerated riot control training program. Plans are drawn for maximum assistance to local authorities. State also is buying \$200,000 worth of anti-riot equipment for use of National and State Guards.

DPS reported it stands ready to make "major commitment" of personnel and equipment on request from a local law enforcement agency — although it hopes none will be necessary.

COURTS SPEAK — Supreme Court held taxable natural gas used as fuel for engines that pump oil.

In a variety of other opinions, High Court ruled as follows:

Lower courts were right in concluding that a Houston fireman was suspended improperly for buying two mink stoles and a color tv set (believed to have been stolen) from another fireman. (Suspended firefighter denied any knowledge of stolen goods.)

Good Year to Control Mesquite Brush, According to SCS Official

"Conditions are in the making for a good year to spray mesquite brush," reports Garth McCallum of the Soil Conservation Service. Mesquite trees, which are now putting forth their first leaves, should make vigorous growth this year due to the surplus moisture received during the past winter and spring.

The SCS recommends that aerial spraying be done during a period of 40-90 days after the first leaves appear in the spring.

Extension Service Giving Instruction To Fire Depts. Here

W. B. (Cotton) Dorman of the extension service of Texas A & M University is giving instruction to the Hamlin Volunteer Fire Department and other fire departments in this area.

The course is approximately 15 hours long and covers hose loads, pumping, effective fire streams, tank fires, and helpful suggestions on using the equipment the department has to the best advantage. This week's drill will conclude the instruction.

Dorman is a former fireman and Fire Chief of Meridian.

The Dodge and Seagraves trucks of the local department were recently inspected and approved by Joe Hackler of the Fire Prevention and Engineering Bureau of Texas.

Herbicides move through the mesquite plant from the leaves to the bud zone below the ground line. "This is why it is important for the trees to have full, well-developed foliage, and be actively growing at the time of spraying," said McCallum.

Research at the Spur Experiment Station over a ten year period has shown that mesquite control is worth a dollar per acre each year in increased cattle gains alone.

The pesky mesquite requires from 1700-1900 pounds of water to produce one pound of dry plant material; only 300-400 pounds of water is necessary to produce the same amount of desirable grasses.

Besides robbing the soil of moisture, the mesquite limits nutrients, sunlight, and space needed for grasses to grow. Mesquite brush also causes problems in handling livestock, which adds to the cost of producing beef.

Current recommendations for aerial spraying of mesquites are for the application of one-half pound per acre of 2.4.5-T mixed in one gallon of diesel oil and enough water to make a total of four gallons.

Cost-sharing assistance for spraying mesquite is available through the county ASCS Office. Special soil and water conservation loans for brush control purposes are handled through the Farmers Home Administration.

Drug Identification Kit In Use Here

The Hamlin Police Department now has a new dangerous drug identification kit, says Police Chief Bryan Wasson. The kit contains eight facsimiles of the more commonly abused dangerous drugs.

The kit will be used as an investigative aid. However, the chief said suspected drugs will be sent to the Texas Department of Public Safety Crime Lab in Austin for positive identification.
